Kinveachy Forest SSSI

Kinveachy Forest SPA

Kinveachy Forest SAC

Kinveachy Forest SSSI, SAC & SPA

Contribute toward expansion of this woodland habitat and provide opportunity for future expansion of protected species into the Lost Forest

Deep Peat

Opportunity to coordinate woodland expansion with peatland restoration projects and ensure that new woodland is created in suitable areas and at suitable distances from active bog habitats

Opportunity to ensure new woodland areas sit sympathetically within the Park landscape and maintain or enhance the local character.

Ancient Semi-Natural Woodlands and Veteran Trees

Contribute toward expansion of ancient woodland sites through creation of appropriate woodland types and species mixtures.

Opportunity to preserve genetic diversity of veteran trees throughout the site by encouraging natural regeneration.

Capercaillie, Wildcats and Red Squirrels

Iconic species will benefit in the long term from increases in available habitat
